About Me

I sit at the intersection of cinema and artificial intelligence — where stories are no longer just filmed, but generated, directed, and crafted frame by frame with AI. With a background spanning films, web series, and ads, I bring both the discipline of a seasoned AD and the creative edge of an AI Director who knows how to turn a prompt into a cinematic experience.

Core Skills

AI Direction	Prompt Engineering	Creative Direction
Storyboarding	AI Video Production	Post-Production (Premiere Pro)
Visual Composition	Script Supervision	Production Coordination

Experience

AI Tools

VIDEO CREATION

- KLING
- RUNWAY
- HAILOU
- SORA
- HIGGSFIELD
- GOOGLE VEO 3.1
- GOOGLE FLOW
- MINIMAX HAILUO
- WAN 2.5
- Luma.Ai

AI PHOTO CREATION

- MIDJOURNEY
- GOOGLE VERTEX
- GOOGLE NANO BANANA
- OPENART
- FREEPIK
- FIREFLY

T-Series

SEP 2025 – PRESENT
AI DIRECTOR

Roles & Responsibilities

- Concept Development: Originated and developed complete creative concepts for each video — defining the narrative idea, theme, visual tone, and storytelling direction from scratch.
- Storyline & Script: Crafted the full storyline for every project, shaping the narrative arc, character flow, and emotional journey before any production began.
- Storyboarding: Translated the storyline into detailed storyboards — visualizing every scene, shot composition, camera angles, and transitions to serve as the production blueprint.
- AI Video Production: Produced all video content using industry-leading AI tools including Google Veo, Kling, and Higgsfield — generating high-quality, cinematic footage aligned with the storyboard.
- Prompt Engineering: Wrote and refined precise prompts to direct AI tools effectively, ensuring visual consistency, style accuracy, and narrative coherence across all generated clips.
- Editing & Post-Production: Assembled and edited all footage end-to-end in Adobe Premiere Pro — including cuts, transitions, color grading, sound synchronization, and final polish.
- End-to-End Ownership: Solely responsible for the entire content pipeline — from the initial creative idea to the finished video delivered to T-Series — with no handoff at any stage.
- Innovation: Continuously explored and integrated emerging AI video tools and workflows to push the quality and efficiency of every production.

Gobo Labs (Animatics)

JAN 2025 – APR 2025

Roles & Responsibilities

- Assisted directors in coordinating production activities across multiple ad campaigns.

- TOPAZ
